

## PROGRAMMING CHALLENGE

CLASSIFIED

Programming Challenge is a category of FITCC which gives an opportunity for significant interaction of university and high school students from different educational institutions, all with the aim of improving their skills in solving minor programming problems and improving communication during group work.

The competition in this category consists of the following stages:

- Registration for participation (no later than May 26, 2021)
- Development of task solutions (June 3, 2021)
- Announcement of the best competitors (June 4, 2021)

The competition in this category is realized individually or in a team of two members (in the following text, both options will be marked as a team). More than one team from the same educational institution can apply. Registration, by filling out the online form, must be done no later than May 26, 2021. After validation of the entered data, the team members will get a confirmation of their registration for the competition.

After the registration is completed, the team representative receives a user account to access the competition part of the website, where the detailed information about the team can be entered.

### Competition rules:

- Students who are enrolled in any faculty / high school in Bosnia and Herzegovina and the region have a right to participate.
- Tasks will be solved using the C++ programming language.
- All registered competitors will receive more detailed information on how to access the tasks just before the start of the competition in this category.
- During the competition, any form of communication with members of rival teams is prohibited.
- Those who are professionally engaged in programming cannot participate in the competition (this refers to competitors employed in software development companies).
- Any attempt to violate the integrity of the competition will result in the disqualification of the team.

### Evaluation method:

More detailed information on the evaluation method will be published soon.
